

## About

DECENTRALIZED, SECURE, P2P E-GAMBLING

DezBet is a fast, decentralized, on-chain e-gaming platform that enables players to directly bet against each other in a secure and transparent way. The House is completely cut out, thus there is no house edge on any games. DezBet will offer all the well known casino games as well as in-house additions to its users. To cover cost of operation a small fee on every transaction is added, but there is no fee on any of the winnings.

## Business Model

## Roadmap

## Problem

SLOW, UNFAIR AND INTRANSPARENT

Online casino games are statistically impossible to win (86.5% of players lose). The platforms are slow, require a lot of steps to start betting and often have questionable reputation. They do not provide any method to verify whether the outcome of the game was fair.

## Solution

FAST, FAIR, SECURE AND TRANSPARENT

DezBet offers a decentralized e-gaming platform where players can bet directly against each other instead of playing against the house, that bases their revenue on the player losing. The platform is easy to use with one-click-to-play interface. We offer full transparency where players can verify every transaction. Our hosting fee model means that the player takes 100% of the winnings. We are a regulated entity with international gambling license.

## Market overview

We have no direct competitors. The platforms we can base our market research on are Stake.com and Decentralized Exchange Pancakeswap with 27.5 Million users since January 2022 and 496 lottery rounds respectively.

## Core Team

AMBITIONED, YOUNG AND SKILLED

Our management team combines the experience of executives with extensive backgrounds in managing and developing successful businesses in the cyber security and software industries. DezBet had six senior executives and several permanent advisory board members with unparalleled business, marketing and technical experience across a variety of fields.
